

My Report

Acknowledgement

I would like to express my deep sense of gratitude towards the smartinternz team and godaddy team for organizing a very effective and skill oriented training program that too freely to students and faculties. It is indeed a wonderful and unique program that has helped me lot to upgrade myself with new skills and technology.

1. OverView

The Project Report Consist of description of my website that was developed and hosted after learning online course provided by smartinternz in association with Go Daddy.

2. Literature Survey

There are so many categories of websites available in market but I find website related to travel and tourism is somewhat fascinating and interesting to me, that's why I selected this category to develop my site with the help of Elementor Plugin , ThemeShine Theme , animista site etc.

3. Implementation

I have developed my website in a wordpress theme Twentytwentyone with little bit of customization done at my end by developing own template and linking it as front page of website.

I have installed elementor plugin first and checked its codes in the folder where it was created. However, as most of the functionality was available in pro version, I switched to a theme related to traveling that was available online. I modified it as per my need . Next I have inserted code :

`<?php /* Template Name: MyPage */ ?>` to recognize my page as template.

Next I use “`<?php echo get_stylesheet_directory_uri(); ?>`” to link my all assets with the pages I have developed.

Then after running website in a localhost under wordpress successfully, I tried to deployed it in godaddy server but it was showing error due to exceed in file size. So next I open file system of godaddy and manually transferred my files to worpress theme folder. But again I got error due to unlinking of css files with mypage. I found that there was a permission error and after rectifying it, it run successfully.

4. Result

My website link is :

<https://mmk.c41.myftpupload.com/>

and demonstration link is :
